LEADING TOMORROW

Building
the Future
Today

Strategic Technology Leadership

CTO as a Service

- Define your technology roadmap
- Get guidance through digital transformation
- Modernize your infrastructure and architecture
- Build AI and data strategies
- Improve DevOps processes

User-Centric Software Solutions

Software Development

- UI/UX focused design
- Web and mobile application development
- Embedded systems software
- API integration and development
- Performance management solutions

Proactive, Visible & Intelligent Management

AI-Driven Management & Automation

- AI-based operations management
- Real-time monitoring and analytics
- Automated decision support structures
- Configuration and DevOps integration
- Smart resource management in data centers

Security is the Assurance of Your Business Continuity

Cyber Security

- DevSecOps and penetration testing
- MFA, SSO, and access policies
- IDS/IPS systems, VPN, and traffic analysis
- Web application security (WAF, DDoS protection)
- Endpoint protection, EDR technologies

From Data to Insight From Insight to Action

Data Science & AI Services

- BI dashboards and reporting
- ETL and data integration processes
- Machine learning and model training
- NLP, chatbots, and sentiment analysis
- Predictive analytics and automation

Enterprise Information Assurance with OpenText

Justech

opentext™

- Document and archive management
- Enterprise content management (ECM)
- Compliance and audit facilitation

Agentic AI Platform

archX

Platform archX

- Infrastructure that connects all systems
- Anomaly detection, prediction, and prevention
- Proactive observability and decision support
- Integrated management with AI agents

Justech

Streamline

Smart Supply Chain Planning

- Demand forecasting and stock optimization
- Simulation-assisted planning
- Integration with ERP systems

Justech

Grafana Labs

In partnership with Grafana Labs, it offers its customers modern, integrated and cost-effective observability solutions. It provides end-to-end visibility from application performance to frontend experience, from Kubernetes infrastructure to log analysis, increasing operational efficiency, shortening problem resolution time and reducing monitoring costs.

- Application Monitoring

It improves user experience by monitoring application performance (response time, error rate, throughput). With distributed tracing, the root cause of problems is quickly reached.

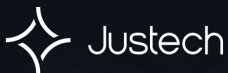

- Frontend Monitoring

It tracks metrics like page load time, user engagement, and error rates with real user monitoring (RUM) and synthetic testing. Improves end-user experience.

- Kubernetes Monitoring

It provides deep visibility at the container, pod, node, and cluster level. It provides automatic discovery, resource consumption analysis, and scalable dashboards through Prometheus + Grafana integration.

Infrastructure Modernization with Red Hat

- Threat prevention and endpoint protection (Harmony)

- Cloud security and Zero Trust approach

- Cross-border network security and IDS/IPS integrations

Intelligent Cyber Threat Defense with Check Point

- Threat prevention and endpoint protection (Harmony)

- Cloud security and Zero Trust approach

- Cross-border network security and IDS/IPS integrations

Implement Best Practices with Axelos Consulting Partner

Our consulting services are supported by globally recognized Axelos best practices. As an Axelos Consulting Partner (ACP), we deliver solutions that will add value to your organization and ensure sustainable success.

Justech

AXELOS

- Access to reliable maturity models such as ITIL® and P3M3®: The ability to assess and improve your organization's IT and project management processes according to international standards.
- Axelos-certified expertise: With our digital badge that proves our competence in our field, we show that we are a reliable and competent business partner.
- Exclusive content based on global knowledge: Up-to-date insights and guidance to guide your strategic decisions.
- Visibility via Axelos.com: By being on a global platform, we provide our customers with easy access and international trust.
